## General information

The prospectus for the funds specified above was prepared in compliance with the Swedish Investment Funds Act (2004:46), Finansinspektionen's Regulations regarding Swedish UCITS funds (FFFS 2013:9), The Swedish Alternative Investment Fund Managers Act (2013:561) and Finansinspektionen's Regulations on Alternative Investment Fund Managers (FFFS 2013:10). This publication and the fund rules for each fund together constitute the prospectus. Fund rules are available online at [www.ohman.se/fonder](http://www.ohman.se/fonder)

### The fund management company

E. Öhman J:or Fonder AB  
Address: Box 7837, 103 98 Stockholm  
Street address: Mäster Samuelsgatan 6, Stockholm  
Email: [fonder@ohman.se](mailto:fonder@ohman.se)  
Phone: +46 20 52 53 00  
Website: [www.ohman.se/fonder](http://www.ohman.se/fonder)  
Corporate Reg. No. 556050-3020  
Founded: 27 January 1994  
Share capital SEK 4,200,000

Authorisation to conduct fund business in accordance with the Swedish Investment Funds Act (2004:46) was granted 28 March 1994 and reauthorisation was granted 4 May 2005. As of 8 January 2016, the company is also authorised to manage alternative investment funds in accordance with the Swedish Alternative Investment Fund Managers Act (2013:561).

### Board of Directors

#### Chairman:

Johan Malm, *CEO E. Öhman J:or AB*

#### Directors:

Björn Fröling, *director E. Öhman J:or AB*

Håkan Gustavson, *CFO Beijer Invest AB*

Åsa Hedin, *director*

Catharina Versteegh, *director E. Öhman J:or AB*

Ann Öberg, *director*

Mats Andersson, *director*

### Executive management

Jamal Abida Norling, *CEO*

Anders Johansson, *Deputy CEO*

Jamal Abida Norling, *Chief Investment Officer*

Fredric Nyström, *Chief Responsible Investments*

Veronica Selander Rosengren, *Chief Compliance Officer & Complaints Officer*

Fredrik Lindell, *Chief Risk Officer*

### Auditors

The fund's audit firm is Ernst & Young AB and Mona Alfredsson is the auditor-in-charge.

## Delegation agreements

The fund management company has made an agreement with Deloitte AB on performance of the internal audit function. Michael Bernhardt (Partner, Enterprise Risk Services, Deloitte AB), is in charge of internal audit.

The fund management company has entered into an agreement under which the accounting department and the IT department have been outsourced to E. Öhman J:or AB. Anna Henebratt (Head of Accounting, E. Öhman J:or AB) is head of the accounting department. Anders Åkesson (Head of IT, E. Öhman J:or AB), is head of the IT department).

## Depositary

Skandinaviska Enskilda Banken AB (publ), 106 40 Stockholm, Sweden. The company's registered office is in Stockholm and its principal business is banking.

The depositary has a system for managing conflicts of interest in connection with performance of its custody mandate. The depositary must act exclusively in the interests of unitholders and independently of the funds and the fund management company. The depositary has established procedures for identifying, managing and monitoring any conflicts of interest. The depositary is engaged in a wide range of activities and conflicts of interest may consequently arise from time to time. In order to prevent conflicts of interest, different areas of operation are segregated and, if conflicts of interest cannot be avoided, internal rules have been established to ensure due and proper treatment of customers. Conflicts of interest may arise in areas such as between the depositary's duties as the depositary and its obligations when the depositary is the counterparty to the fund management company with regard to other services, such as trading in financial instruments. Current information about the depositary, its business and the conflicts of interest that may arise is available from the fund management company on request.

## Target group

The fund management company is oriented primarily towards companies and institutions.

## Unitholder register

The fund management company maintains a register of all unitholders and their holdings. Units must be registered to qualify for the right to shares in the fund and associated rights. Unitholders receive reports in the form of annual statements.

## Cessation of the fund or transfer of fund operations

If the fund management company decides that a fund should cease or that the management of a fund, upon approval by Finansinspektionen, shall be transferred to another fund company, all unitholders will be informed. The information will be published in Post- och Inrikes Tidningar and be available for inspection at the fund management company and the depositary. Finansinspektionen may decide on an exemption from publication if special reason exists. If Finansinspektionen withdraws the fund management company's authorisation or if the fund management company enters into liquidation or is declared bankrupt, the depositary must immediately take over management of the funds.

## Marketing in other countries

Marketing of funds managed by the fund management company is permitted in other countries as follows:

#### Norway:

Öhman Emerging Markets, Öhman Etisk Index Sverige, Öhman Företagsobligationsfond, Öhman Global Growth, Öhman Global, Öhman Global Småbolag, Öhman Marknad Europa, Öhman Marknad Global, Öhman Marknad Japan, Öhman Marknad Pacific, Öhman Marknad USA, Nordnet Indeksfond Danmark, Nordnet Indeksfond Norge, Nordnet Indeksirahasto Suomi, Nordnet Indexfond Sverige.

#### Luxembourg:

Öhman Företagsobligationsfond, Öhman Småbolagsfond, Öhman Sweden Micro Cap.

#### Denmark:

Nordnet Indeksfond Danmark, Nordnet Indeksfond Norge, Nordnet Indeksirahasto Suomi, Nordnet Indexfond Sverige.

#### Finland:

Nordnet Indeksfond Danmark, Nordnet Indeksfond Norge, Nordnet Indeksirahasto Suomi, Nordnet Indexfond Sverige.

The fund management company has contracted with distributors in the countries where some of the funds are marketed. Under these agreements, the distributor agrees to ensure the subscription/redemption of units and the provision of information related to the funds.

### Tax rules

Tax liability of the fund: As of 2012, fund income is not taxable. Funds do, however, pay withholding tax on dividends received on their foreign equity holdings. The withholding tax varies from country to country. For reasons including legal uncertainty about the application of double taxation treaties and developments within the EU in the tax area, the withholding tax may be either higher or lower than the preliminary withholding tax deducted when the dividend is received.

Tax liability of investors: Swedish unitholders pay income tax on an annual standardised income calculated on the value of fund units at the beginning of each year, as well as tax on profits and any dividends received on fund units. The annual standardised income corresponds to 0.4 percent of the value of the units at 1 January each year. The standardised income is reported as capital income and taxed at 30 percent. Income statements for tax purposes are issued for natural persons and estates taxable in Sweden, while legal persons must independently calculate the standardised income and pay the tax. The tax may be affected by individual circumstances and investors who have questions about possible tax consequences should seek expert advice.

### Statements for tax purposes

Income statements for tax purposes are submitted to the Swedish Tax Agency for natural persons and estates taxable in Sweden. Statements are issued for dividends, capital gains and capital losses. Statements for tax returns are issued to unitholders with the annual statement.

### Liability to pay damages

The fund management company and the depositary shall not be held liable for loss arising from Swedish or foreign legal enactment, measures taken by the Swedish government or a foreign government, act of war, strike, lockout, boycott, blockade or comparable circumstance. The proviso in respect of strike, blockade, boycott and lockout will apply whether the fund management company or the depositary initiates or is the object of such labour action. Loss that has arisen in cases other than those referred to in the first paragraph above shall not be compensated by the company or the depositary if they have exercised due care. The company and the depositary shall not under any circumstances be held liable for indirect loss or for loss caused by a custodian bank or other delegate that the company or the depositary has engaged with due care or for loss arising by reason of restrictions upon disposition that may be imposed on the company or the depositary.

If the fund management company or the depositary is prevented from taking measures as a consequence of a circumstance set forth in the first paragraph above, these measures may be delayed until the impediment has ceased to exist.

The foregoing limitations of liability do not limit the unitholder's right to damages in accordance with chapter 2, section 21 and chapter 3, sections 14-16 of the Swedish Investment Funds Act (2004:46).

### Amendments to fund rules

The company is permitted to amend fund rules. Such amendments are subject to approval by Finansinspektionen. Amendments may affect the characteristics of the fund, such as the fund's investment strategy, risk profile, fees and charges. After the amendment has been approved, the decision must be made available for inspection at the company and the depositary and be published in the manner instructed by Finansinspektionen.

### Remuneration policy

The board of directors of the fund management company has adopted a remuneration policy that is consistent with and promotes sound and effective risk management. The remuneration policy is designed to discourage risk-taking that is incompatible with the risk profiles of the funds managed by the fund management company. Moreover, the remuneration policy should discourage excessive risk-taking and encourage employees to deliver sustainable performance at all times, as well as sound and effective risk management for unitholders, the fund management company and the funds managed by the fund management company. Information about the fund management company's current remuneration policy is available online at [www.ohman.se](http://www.ohman.se). A printed copy of the information will be provided free of charge upon request. Please contact the fund management company.

Further information about subscription and redemption of fund units and the necessary forms are available on the fund management company's website. Öhman Fonder has made agreements with distributors to sell the fund management company's funds. The current list is available online at <https://www.ohman.se/fonder/distributorer/>

### Limiting orders

Subscription and redemption orders for fund units cannot be limited.

### Investment in own funds

The fund management company may from time to time invest on funds' behalf in other funds managed by the fund management company (own funds). The selection among own funds is evaluated in the same way and on the same terms as for external funds.

<sup>1</sup> For share class D, the current fixed management fee amounts to 1% and the performance-based fee corresponds to 20% of the return threshold.

<sup>2</sup> The fund invests a significant portion of fund assets in funds managed by Öhman. When the fund invests in other funds managed by Öhman, the fund is compensated for the fixed management fee in the underlying fund.

<sup>3</sup> No management fees or other operating expenses, whether direct or indirect, are taken out of the fund. Nor does the fund pay any commissions related to transactions in financial instruments. These costs are entirely covered by Nordnet.

The current management fee covers the fund management company's costs for management, administration, marketing and distribution. The charge also covers the costs of custody of securities,

supervision and auditing, as shown in the table above. The term “ongoing charge” is used in the Key Investor Information Document (KIID) for each fund. In addition to the aforementioned costs, the ongoing charge includes the costs of purchases of external research.

## Research costs

The fund management company obtains external investment research in the course managing some of the fund management company’s funds. Based on a budget prepared by the fund management company, investment research costs are taken out of the funds daily and are reported separately. As of February 2015, external investment research costs are separated from transaction costs, which makes it clearer to unitholders what costs are charged to the funds and what they are for. External investment research is obtained for the following funds: Öhman Emerging Markets, Öhman Etisk Index Sverige, Öhman FRN, Öhman Företagsobligationsfond, Öhman Global, Öhman Global Growth, Öhman Global Småbolag, Öhman Grön Obligationsfond, Öhman Hälsa och Ny Teknik, Öhman Investment Grade, Öhman Kort Ränta, Öhman Marknad Europa, Öhman Marknad Global, Öhman Marknad Japan, Öhman Marknad Pacific, Öhman Marknad Sverige, Öhman Marknad USA, Öhman Obligationsfond, Öhman Realräntefond, Öhman Räntefond Kompass, Öhman Småbolagsfond, Öhman Sverige, Öhman Sverige Fokus, Öhman Sweden Micro Cap, Läraryfond 21–44 år, Läraryfond 45–58 år, Läraryfond 59+ och Nordnet Hållbar Pension.

## Historical returns

Please refer to the KIID for each fund for information about the funds’ historical returns.

## Securities lending

The fund management company uses securities lending as a technique/instrument to generate income to the respective funds. A description follows of how securities loans are managed for all of the fund management company’s funds, to the extent that a fund lends securities. For more detailed information about a fund’s actual use of securities lending, please see the relevant fund’s annual and semi-annual reports.

The fund management company’s funds lend equities and fixed income securities. The respective funds are permitted to lend securities to an extent corresponding to a maximum of 20 percent of fund assets. An estimated maximum of 18 percent of fund assets may be considered for securities loans. The funds specified as engaging in securities lending are normally expected to lend less than 10 percent of fund assets, but the volume may vary significantly from time to time. Lending of 100 percent of a single equity position is not permitted. The fund retains at least one share so that the fund management company receives notice of corporate events.

Securities loans are arranged only with Skandinaviska Enskilda Banken (SEB) as the counterparty. Cash and cash equivalents are the only acceptable collateral from SEB. Assets that are the objects of securities loans are also in custody with SEB, which is the depository for the fund management company’s funds.

In connection with securities loans, the fund is exposed to risk that the counterparty will not return lent securities combined with failure of the depository to segregate collateral, as well as to the risk of differing interpretations of the securities lending agreement.

All income arising from the use of securities loans accrues to the fund.

Collateral is managed by the fund’s depository.

## Responsible investment

At Öhman Fonder, we know that the future challenges we are facing are going to put new demands on us as managers of our clients' capital. Through our work with responsible investment, we are encouraging a more long-term investment climate in which environmental, social and governance factors (ESG) are included in the investment process. Responsible investment thus becomes a key prerequisite for achieving our objective of generating good long-term returns. Öhman Fonder must act as a responsible owner. We advocate high environmental and social standards as well as good ethics in the companies in which we invest. Öhman Fonder has signed the UN-supported initiative Principles for Responsible Investment (PRI) and complies with international conventions.

Our Responsible Investment Policy covers all funds managed by Öhman Fonder. The policy applies to the funds' direct investments in Swedish and foreign equities and bonds. When indirect investments are made via fund units and derivatives, the policy is applied to the greatest possible extent. Funds that Öhman Fonder manages on behalf of Nordnet are exempt from this policy.

Responsible investment at Öhman Fonder proceeds from three strategies: negative screening, positive screening and influence.

1. Negative screening – Öhman Fonder does not invest in companies that profit by business activities that we deem unethical.
2. Positive screening – Öhman Fonder invests in companies that are economically, environmentally and socially sustainable and which are best aligned with our high standards for sustainable business.
3. Influence – Öhman Fonder is an active owner and promotes responsible governance and good business ethics in the companies in which it invests. We work to exert influence through corporate engagement – engaging in dialogue with the companies and attending general meetings. Corporate engagement is most effective in cooperation with other investors who share our values. The work to exert influence is pursued by the fund management company on behalf of funds. Refer also to Öhman Fonder's Corporate Governance Instruction.

## Sustainability-related disclosures

Information is provided below about the management of each fund with regard to sustainability, including in matters pertaining to the environment, social conditions, labour, respect for human rights and anti-corruption. The review describes the sustainability factors taken into account in fund management and the methods used in sustainability work. The report has been prepared in accordance with Regulation (EU) 2019/2099 on Sustainability-related Disclosures in the Financial Services sector (the Disclosure Regulation) and the Swedish Investment Fund Association's Guidance on Sustainability-related Disclosures for Funds. A report on follow-up of sustainability work by the fund management company is provided in the annual report for each fund.

### Sustainability-related disclosures for corporate bond funds

Öhman FRN Hållbar, Öhman Företagsobligation Hållbar, Öhman Företagsobligationsfond and Öhman Räntefond Kompass Hållbar

#### **Transparency regarding the integration of sustainability risks, promotion of environmental or social characteristics and sustainable investment**

- The fund has sustainable investments as an objective
- The fund promotes, among other characteristics, environmental or social characteristics
- Sustainability risks are integrated into investment decisions, but the fund does not promote environmental or social characteristics or have sustainable investments as an objective
- Sustainability risks are deemed not to be relevant (explanation below)

Fund management company's comments:

*A sustainability analysis is a logical component of the research performed before investing in a new company and on an ongoing basis after a security is acquired. Within the framework of the sustainability analysis, the fund management company evaluates how the companies are working with their most material sustainability risks and opportunities. Within the framework of this analysis, the fund management company also searches for innovative companies that are, through products or services, seeking solutions to long-term sustainability challenges.*

*The analysis promotes the composition of a portfolio of companies whose sustainability programmes will be strengthened over time or companies that are already leaders within such programmes. In so doing, the fund avoids companies with high sustainability risks that can have adverse impact on return and invests in companies that can make a positive contribution to return and to sustainable development.*

#### **Sustainability-related characteristics promoted in fund management**

- Environmental characteristics (e.g. the companies' environmental and climate impact)
- Social characteristics, e.g. human rights, employee rights and equal opportunity
- Good governance practices (e.g. shareholders' rights, issues relating to remuneration for senior executives and anti-corruption work)
- Other sustainability-related characteristics

Fund management company's remarks:

*Öhman Fonder believes that an economic system in which companies and investors think and act long-term, i.e., seek to minimise adverse impact and maximise positive impact on people and the environment, is optimal for sustainable growth.*

*Öhman Fonder's definition of "sustainability" is based on the corporate activities that maintain or improve a company's capacity to generate long-term financial and social value.*

*In an ESG analysis, the fund management company assesses a company's preparedness and management of – for the company – material sustainability factors, meaning factors that could have impact (positive or negative) on the company's financial position and performance. Sustainability risks may encompass numerous factors and the fund management company must, in its sustainability analysis, identify and focus on a limited number of "material criteria" that could actually have impact on the individual company's financial performance. These environmental and social characteristics thus vary depending on the company and sector.*

The characteristics that Öhman Fonder promotes are:

- **The Environment component of ESG refers to environmental criteria.** This includes factors such as use of resources, carbon emissions and waste and their impact on the environment and climate. Every company has impact on and is impacted by the environment, but to varying extents based on the individual company and its sector.

- **The Social component of ESG refers to social criteria** and addresses the relationships and interactions between a company and the people in the communities where they operate their business. Social criteria also include relationships with employees, diversity and fundamental human rights. Every company operates in and is dependent upon a fair and functional society.
- **The Governance component of ESG refers to corporate governance criteria.** Corporate governance encompasses the internal governance systems, procedures and controls that a company implements to make effective decisions, comply with the law and live up to the expectations of external stakeholders. Every company needs an efficient and effective governance system for sustainable and profitable development.

The fund considers the environmental objectives of the EU taxonomy: Climate change mitigation and Climate change adaptation.

Refer to the section “Methods used to promote environmental or social characteristics” for a description of how social characteristics are promoted.

#### **Reference benchmarks**

The fund has designated the following index as the reference benchmark:

The fund has not designated an index as a reference benchmark

Fund management company's comments:

*The fund does not use an index to compare the fund's integration of sustainability risks against a reference benchmark.*

#### **Information on the EU taxonomy for environmentally sustainable activities**

The EU taxonomy is a classification system that aims to establish common criteria for environmentally sustainable economic activities.

According to legislation, disclosure of the proportion of a fund's investments that are taxonomy aligned is required.

The taxonomy is under development and the criteria for all environmental objectives are not yet complete. Also, there is no established methodology for the calculation of the proportion of a fund's investments that are taxonomy aligned. The companies in which the fund invests have not yet started reporting the extent to which their activities are aligned with the EU taxonomy. For these reasons, it is the assessment of the fund management company that it is presently not possible to disclose reliable information on the proportion of the fund's investments that are aligned with the taxonomy.

The legislation includes a “do no significant harm” principle which requires that investments that contribute to a sustainable objective, do not simultaneously significantly harm any of the other sustainable objectives. The “do no significant harm” principle is only applicable to the proportion of the fund that consists of investments that are deemed sustainable either according to the regulation on sustainability-related disclosures or the EU taxonomy. The remaining proportion of this fund has underlying investments that do not take into account the EU criteria for environmentally sustainable economic activities.

#### **Methods used to promote environmental or social characteristics**

**Positive screening**

Fund management company's comments:

*A sustainability analysis is performed before investing in a new company and on an ongoing basis after a security is acquired. Sustainability analysis is a component of the company analysis in which each company is assigned a sustainability score. The fund screens in companies assessed as managing sustainability risks in a systematic manner.*

Supported by an integrated sustainability analysis, Öhman identifies companies it believes are sustainable investments:

- The company operates in accordance with international norms and conventions
- The company develops and offers innovative products and services
- The company acts to minimise adverse impacts on people and the environment
- The company has good business ethics
- The company sets clear and measurable sustainability-related targets

The fund makes every effort to invest in companies that:

- Have a comprehensive sustainability programme that addresses material risks, taking into consideration factors including the company's size and geographical presence, but where its sustainability programme is not yet reflected in the valuation of the security
- Have only recently begun to develop a sustainability strategy but are showing clear signs of prioritisation and improvement in the area
- Have interesting products and services with a clear sustainability link (links to the Sustainable Development Goals and/or the EU Taxonomy), for which clearly higher demand has been identified

#### Negative screening

The fund does not invest in companies that are involved in the following products and services. A maximum of 5% of the turnover in the company in which the investment is made may entail operations attributable to the specified product or service. 1. In the assessment of companies that are parent companies whose interest in a subsidiary exceeds 50%, subsidiary turnover is taken into consideration with regard to the following screening criteria.

#### **Products and services**

Cluster bombs, land mines  
Fund management company's comments: 0%

Chemical and biological weapons  
Fund management company's comments: 0%

Nuclear weapons  
Fund management company's comments: 0%

Weapons and/or munitions  
Fund management company's comments:  
*Weapons: Production 0%, Distribution 5%. Munitions: Production and Distribution 5%*

Alcohol  
Fund management company's comments:  
*Production and Distribution 5%*

Tobacco  
Fund management company's comments:  
*Production 0% Distribution 5%*

Commercial gambling operations  
Fund management company's comments:  
*Production and Distribution 5%*

Pornography

Fund management company's comments:

*Production 0% and Distribution 5%*

Fossil fuels (oil, gas, coal)

Fund management company's comments:

*The exclusion refers to companies that extract fossil fuels. 0%*

Other

Fund management company's comments:

*Cannabis (production and distribution) 5%*

### **International norms**

“International norms” refers to international conventions, laws and agreements such as the UN Global Compact and OECD guidelines for multinational companies in relation to the environment, human rights, labour practices and business ethics.

The fund does not invest in companies that violate international norms. The assessment is carried out either by the fund management company itself or by a subcontractor.

### **Other**

Other

Fund management company's comments:

*The fund does not invest in companies involved in oil and gas service (max 10 percent of turnover) or coal-based energy production (max 10 percent of turnover).*

**The fund management company influences**

The fund management company exercises its investor influence to influence companies on sustainability issues. The fund management company engages with companies with a view to influencing them to adopt a more sustainable approach.

In-house investor influence

Fund management company's comments:

*Öhman initiates shareholder engagement when a company is assessed as being exposed to high sustainability risk that is not being managed to satisfaction or demonstrates shortcomings in its operations. By expressing Öhman's expectations, as an investor, related to corporate sustainability programmes, companies are influenced to adopt a more sustainable approach.*

Investor influence in cooperation with other investors

Fund management company's comments:

*Öhman works with other investors in several different forums and initiatives to achieve greater impact, including via PRI, IIGCC, Climate Action 100+ and others. For more information, refer to <https://www.ohman.se/hallbarhet/>*

## Risk information

### Risk profiles of the funds

Each fund's risk rating category is based on a synthetic risk and reward indicator, which shows the connection between the risk and potential return of an investment in the fund. The indicator is an EU standard and is based on how the value of the fund has changed over the past five years. Category 1 does not mean the fund is risk free. The fund's risk rating category may change over time. This is because the indicator is based on historical data, which is not a guarantee of future risk and reward. Information about each fund's risk rating is provided in the KIID.

Risk-taking in the funds is monitored and checked regularly and carefully in order to ensure compliance with laws and investment limits.

Historical returns are not a guarantee of future return. The money invested in funds may increase or decrease in value and there is no guarantee that you will recoup your entire investment.

### Risk assessment method

Certain funds invest in derivative instruments. The "commitment method" is used to calculate the global exposure of the funds. According to the commitment method, derivative positions are converted to an equivalent position in the underlying assets.

# Öhman Företagsobligationsfond

## Objective and investment strategy

Öhman Företagsobligationsfond is a fixed income fund whose objective is to give investors attractive risk-adjusted returns from the investment grade corporate bonds market.

The fund is managed actively and sustainably. The fund invests mainly in investment grade bonds issued by Nordic companies. Sustainability aspects are considered in the context of corporate economic analyses and investment decisions, and play a part, but not necessarily a crucial one, in determining which corporate bonds are selected for inclusion in the fund. Sustainability aspects are an explicit component of the investment process, are continuously analysed and affect fund investments. More detailed information about the fund's sustainability programme is provided in the section on sustainability information earlier in this document.

The fund's strategy is to invest in attractively valued bonds with high credit quality issued by companies with strong balance sheets. The fund manager begins with a general macroeconomic analysis and then seeks investment themes that are benefiting from prevailing trends. A credit analysis follows in the next step, which results in a list of qualified sectors and companies from which the manager makes the final selection of individual corporate bonds. The fund normally has a remaining fixed interest duration of 2-4 years. All currency risk is hedged back to SEK, which is the fund's base currency.

The fund is permitted to invest its assets in transferable securities, money market instruments, derivative instruments, fund units and accounts with credit institutions. The fund is permitted to use derivatives as part of its investment strategy. The fund is permitted to use such derivative instruments referred to in chapter 5, section 12, subsection 2, IFA (OTC derivatives). The fund is permitted to invest a maximum of 10 percent of its net asset value in fund units. The fund is permitted to invest its assets in transferable securities and money market instruments as referred to in chapter 5, section 5 IFA (OTC securities), up to a maximum of 10 percent of the net asset value of the fund. The fund is permitted to invest more than 35 percent of fund assets in bonds and other debt instruments issued or guaranteed by a central government within the European Economic Area (EEA).

## Risk profile

The fund is an actively managed fixed income fund and is consequently exposed to price variations in the form of interest risk and credit risk. Investments in fixed income securities often involve lower risk than savings in equities.

The fund invests mainly in bonds issued by Nordic companies. Due to an interest rate duration of 2-4 years, the fund is exposed to a certain level of interest rate risk. Credit risk is mitigated by the fact that the manager seeks exposure to companies with higher credit ratings. The fund invests in securities that may have higher liquidity risk on occasion, such as when the market is unsettled. Currency risk is hedged back to SEK, which is the fund's base currency.

The fund is permitted to keep a certain portion of fund assets in cash and cash equivalents, for example in order to manage unitholders' demands to redeem fund units without delay. The fund is permitted to invest in derivative instruments as part of its investment strategy, which means that the fund can create leverage. Management aims to be exposed to the markets corresponding to 100 percent of the net asset value of the fund, but with consideration given to the strategies laid out above, the fund's exposure may both exceed and fall short of this level, where increased exposure involves higher market risk.

A number of risks that are particularly relevant to the fund are described below:

- Market risk – the risk that the value of securities holdings may fall, which will affect the net asset value of the fund. Market risks may include the following:
  - Interest rate risk - The risk that the value of interest-bearing securities holdings will fall due to changes in the general interest rate situation. When interest rates go down, the value of a fund's holdings of interest-bearing instruments rises. Conversely, when interest

- rates go up, the value of holdings falls. Fixed income funds that invest in interest-bearing instruments with long maturities are exposed to higher risk.
  - Credit risk – The risk that the actual or perceived credit rating of issuers of fixed income securities, including those of investment grade, will deteriorate, which may cause the value of holdings in fixed income securities to fall.
- Liquidity risk – Entails a risk that it will be difficult or impossible to sell fund assets at a particular point in time because the price of the assets is not considered favourable or cannot readily be valued. Transparency is lower in the corporate bond market and pricing is based to a great extent on supply and demand and in rare cases supply can be considerably greater than demand. Consequently, it can be difficult or impossible to sell corporate bonds in the market, which may make it difficult to value the fund’s assets. The fund therefore has a higher liquidity risk, which can in extreme cases mean that requests to redeem (i.e., withdraw) fund units cannot be immediately executed.
- Concentration risk – The risk that the investment strategy of the fund will entail concentrated exposure to a particular type of investment strategy.
- Operational risk – The risk of loss due to inadequate or failed procedures, human error, systems failure, or external events.
- Counterparty risk – The risk associated with a counterparty that suspends payments or otherwise fails to perform its obligations, for example when the fund has accepted collateral for derivatives holdings or securities lending.

#### **The fund’s level of active management**

The fund’s benchmark index is Solactive SEK NCR Fix Short IG Corporate Index. There is a clear Nordic orientation to the fund’s investments, where the bonds are not required to have a credit rating from a rating institution. This is clearly reflected in the index.

The fund’s objective is to outperform its benchmark index, before the management fee. The fund management company strives to meet this objective through investment processes based on active decisions in relation to interest duration and interest curve exposure, allocation among credit risks, industry sectors, corporate bonds and geographical regions, as well as the application of sustainability criteria.

Active risk (tracking error) for the past 10 years

2012	N/A
2013	N/A
2014	N/A
2015	N/A
2016	N/A
2017	N/A
2018	N/A
2019	0.55
2020	2.15
2021	2.25

The fund started to issue units in 2003 and did not have a benchmark index until January 2018 and will thus not have sufficient history to calculate 24 months of active risk until 2019. The fund is an actively managed fixed income fund, which leads to deviations from the index. The active management score depends on how the fund co-varies with the market and the characteristics of the fund’s exposure. When the active management score rises, this may be due to overweight or underweight compared to the benchmark index related to interest duration and/or individual securities; it may also be due to changes in the market. The fund does not have a ten-year history of active management scores, but is within the range of the level of active management that can be expected in a comparison of similar actively managed fixed income funds.

#### **Unit classes**

Dividend policies differ among the unit classes of the fund. Unit Class A and Unit Class C do not distribute dividends. Unit Class B does distribute dividends. Further information about dividend distribution is provided in the fund rules. Distributors, which represent an underlying investor collective, are permitted to

acquire units in Unit Class C against a lower fee in lieu of remuneration for distribution. The management fee varies among the unit classes. See “Current and maximum charges” in this prospectus.

**Solactive AG Index**

The financial instrument is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the Issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the financial instrument constitutes a recommendation by Solactive AG to invest capital in said financial instrument nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this financial instrument.
