**Type**  
UCITS

**Tenor**

The fund does not have a maturity date. The fund company is entitled to terminate the fund unilaterally and redeem the fund units. See the information provided in the fund prospectus.

**Objectives**

Öhman Företagsobligationsfond A is a fixed income fund whose objective is to give investors an attractive risk-adjusted return from the investment grade corporate bonds market. The fund is managed actively and sustainably. The fund invests mainly in bonds issued by Nordic companies. Sustainability aspects are an explicit component of the investment process and affect the fund's investments. The fund promotes environmental and social characteristics in accordance with Article 8 of the Disclosure Regulation.

The fund's benchmark index is Solactive SEK NCR Fix Short IG Corporate Index (Index calculated by Solactive AG). The fund's return is determined by how the fixed income securities in which the fund invests increase or decrease in value during the holding period. This unit class does not distribute dividends and all income is reinvested. Fund units can normally be purchased and sold on all banking days via our Swedish distributors.

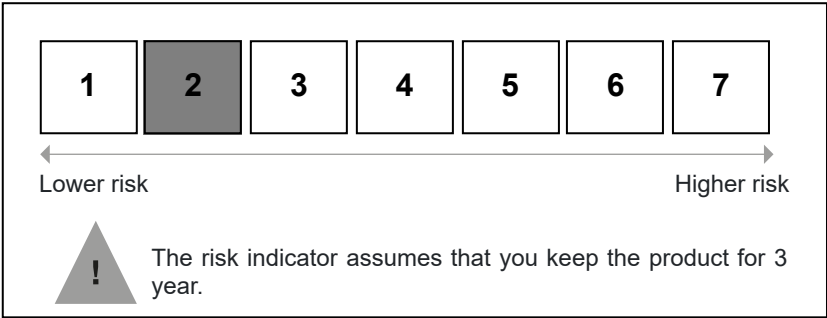

**Intended retail investor**

This fund may be suitable for investors who plan to keep their investment for at least 3 years and who understand that the money invested in the fund can both increase and decrease in value and that there is no guarantee you will get back all the capital you invest. No special knowledge or experience with investment funds or financial markets is required to invest in the fund.

Depository: Skandinaviska Enskilda Banken AB (publ), whose registered office is in Stockholm, Sweden. Annual reports, semi-annual reports, prospectuses, the latest unit value and other practical information (in Swedish) is available at no charge on the fund company's website, [www.ohman.se/fonder/fondlista/](http://www.ohman.se/fonder/fondlista/)

**What are the risks and what could I get in return?**

**Risk indicator**

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. We have classified this product as 2 out of 7, which is a low risk class. This means the fund has low risk for upturns and downturns in unit value. Examples of risks and other factors that are not necessarily captured by the Summary Risk Indicator are: operational risk, counterparty risk, liquidity risk, gearing risk and information risk, in that the return history may not adequately capture the fund's entire risk. This product holds no capital protection against future market performance. You may therefore lose all or part of your investment.

**Performance Scenarios**

Recommended Holding Period: 3 year. Investment example: 100 000 SEK.  
What you might get back after costs.

What you get back from this product depends on how the market performs in the future. Future market performance is uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios show the worst, average and best performance for the product or relevant index during the past 10 years. The market may perform completely differently in the future.

Scenarios	If you cash in after 1 year	If you cash in after 3 year (Recommended Holding Period)
<i>Minimum</i>	There is no guaranteed minimum return. You may lose all or part of your investment.	
<i>Stress</i>	90 064 SEK (-9.35% Average return each year)	92 210 SEK (-2.7% Average return each year)
<i>Unfavourable</i>	92 208 SEK (-7.92% Average return each year)	94 425 SEK (-1.95% Average return each year)
<i>Moderate</i>	101 011 SEK (1.15% Average return each year)	104 040 SEK (1.34% Average return each year)
<i>Favourable</i>	105 059 SEK (5.95% Average return each year)	106 066 SEK (2.16% Average return each year)

The figures shown include all the costs of the product itself, but may not include all costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you could get back under extreme market conditions. Unfavourable scenario: This scenario occurred for an investment between September 2019 - September 2022. Moderate scenario: This scenario occurred for an investment between May 2015 - May 2018. Favourable scenario: This scenario occurred for an investment between January 2014 - January 2017.

**What happens if  
Öhman Fonder is  
unable to pay  
out?**

According to the law, the fund company is not allowed to keep fund assets in its custody. Instead, each fund must have a special custodian institution - a depositary - that keeps the fund's assets in safe custody. If the fund company were to go bankrupt, the depositary would take over management of the fund. There is no other compensation or guarantee scheme for investors in the fund.

**What are the  
costs?**

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time. If the fund is part of another product, such as fund insurance, there may be other costs for the product.

**Costs over time?**

The tables show the amounts taken from your investment to cover various types of costs. The amounts vary depending on how much you invest, how long you keep the product and how your product performs. The amounts shown here are based on an example investment amount and various possible investment periods.

**We have assumed the following**

The first year, you will get back the amount you invested (0% annual return). For 3 years, we have assumed that the product performs in accordance with that shown in the moderate scenario. Investment of SEK 100 000.

Costs	If you cash in after 1 year	If you cash in after 3 year (Recommended Holding Period)
<i>Total Costs</i>	1 150 SEK	3 584 SEK
<i>Impact on return (RIY) per year*</i>	1.15 %	1.18 % each year

\* This illustrates how costs will reduce your return for each year during the holding period. It shows, for example, that if you cash in at the recommended holding period, your average return per year is calculated as 2.49% before costs and 1.34% after costs. As payment for their services, the person who sells the product to you may be paid part of the costs that you pay to us. You will be informed of the amount.

**How long should I hold it and can I take money out early?**

Recommended holding period: 3 years. The fund does not require a minimum holding period, but because it invests in fixed income securities, it is suitable for a short-term to medium-term investment horizon. You should be prepared to invest in the fund for at least 3 years. You will normally be able to sell your fund units on any banking day with no additional fees.

**How can I complain?**

If you wish to lodge a complaint about the fund, you can contact the person who advised you or sold the product to you. You can also contact the fund company online at [www.ohman.se/legal/ohmanfonder/klagomal/](http://www.ohman.se/legal/ohmanfonder/klagomal/) or in writing by email to [klagomal@ohman.se](mailto:klagomal@ohman.se) or by postal letter to Öhman J:or Fonder AB, Box 7837, 103 98 Stockholm, Sweden.
