FAIR VALUES SINCE 1906

Dear Investor,

The global economy delivered positive performance during the year and exceeded most analysts' expectations, while cost pressure remained moderate. As we have seen so many times before, the markets tend to be more resilient to geopolitical unrest during periods characterised by good and accelerating growth. Returns in the equity markets once again outperformed returns in the bond market by a wide margin, while bond rates remain at very low levels, even though central banks, led by the Federal Reserve, have begun to reduce quantitative easing or indicate that this is on the way. Volatility in the equity market has also been unusually low during the year, despite political anxiety related to the Brexit talks, several elections, terrorist attacks and, not least, the tensions between the US and North Korea. 2017 was a relatively uneventful year for the fixed income market, with fairly minor interest rate movements in Sweden and internationally.

In the rear-view mirror, 2017 looks like a year when the stars were perfectly aligned. The year began with a sense of hesitancy in the wake of the American election. Investors' exposure to the equity market was also relatively modest, and the fact that growth had taken off was not obvious enough to convince investors en masse. As the strength of the global economy became apparent, both in the statistics and in corporate earnings, market sentiment shifted and became increasingly optimistic, helping boost share prices to new heights. It was also a factor in the Federal Reserve being able to raise rates without spooking the markets. Although valuations have risen here and there, share prices have also risen for fundamental reasons in several areas, where we have actually seen profits rise by double digits. 2017 thus turned out to be the year of surprises.

We are now moving into 2018 with a global economy that still looks strong, although many activity indicators are at such high levels that it could hardly get any better. We can probably expect the economy to slow down somewhat, but recession still looks remote. Consequently, the economy seems strong enough for companies to continue generating good earnings. The central banks are also continuing to take additional, prudent steps towards more normalised monetary policy, while inflation is at a level right now that allows them to move forward very carefully. We know that valuations are high in all asset classes.

The market tends to undergo regular corrections, when valuations are taken down to somewhat less demanding levels. 2017 was characterised by strong financial markets with very minor to almost zero variations or stutters in the upticks. But several factors indicate that 2018 may be characterised by somewhat higher volatility and the risk of corrections should not be underestimated as the global economy moves from acceleration into a more stable, perhaps slightly declining, growth phase.

Management results for our funds were generally very good in 2017. Among our active equity funds, Öhman Småbolagsfond and Öhman Sweden Micro Cap were two of the best in their category viewed across the full year. As for Swedish equity funds with a wider orientation, we can report that management results were also very good for Öhman Sverige Fokus, which started in May, and Öhman Sverige Smart Beta. Öhman Sverige Hållbar switched managers in the autumn and has since demonstrated very good returns. On the global side, Öhman Global Growth was one of the winner funds and Global Hållbar also performed considerably better than the index.

On the fixed income side, we can, despite the conditions of low interest rates and credit spreads, put yet another year of relatively solid returns behind us. We were positive towards equities and credits during most of the year, which benefited funds and portfolios with active allocation. Developments on the flow side were also very good in 2017, with net inflows to our funds above SEK 3 billion.

We have also continued along the beaten path of acquisitions and expansion. This included acquiring the Gustavia Sverige fund from Gustavia Kapitalförvaltning and starting five new funds, all in close cooperation with our clients, who are generally making clearer demands for sustainable funds across asset classes. Our new green bond fund is one of many indications of this.

We implemented a number of changes to our family of funds during the year. After Öhman acquired DNB's Swedish fund and wealth management operations in 2016, we had several funds within our respective product categories. We have also successively improved and clarified our products and our offering, which has resulted in fund mergers and a major project to carefully review and improve the investment process. We have increased the number of sustainable funds in the fixed income and equity categories, and the percentage of sustainable funds has also increased as a share of our total product offering, which is fully aligned with our strategy.

An event we also covered in the half yearly report was that Sweden's Best Fixed Income House for 2017 – Öhman – gained a new head earlier this year. We are delighted that Lars Kristian Feste is carrying on the successful work that he and the team helped build up under the leadership of Sven Elowson, who has retired. In addition to Best Fixed Income House, Öhman was also named Sustainable Investment Firm of the Year, an award we received with as much pride as awards for outstanding management. Over the years, our sustainability work has become a core competency and an area where we intend to remain at the forefront of our industry.

We at Öhman will sustain our efforts to improve products and services for our clients, with diligence and determination. We are already among the best in the business in several areas – corporate bonds, Swedish small caps and sustainability, to name a few – and our goal is to make that so in all parts of our business.

The Best Fixed Income House and Sustainable Investment Firm of the Year awards are concrete evidence of our successful efforts and endeavours to be at the head of the class in our focus areas. The strong management results across the board on the equity side last year were yet another sign that we are going in the right direction. 2017 was a proactive, exciting and successful year for Öhman. Our purpose is firm and conditions are favourable for moving forward on the same path in 2018.

Pablo Bernengo CEO, Öhman Fonder

# SWEDEN MICRO CAP

## Investment strategy

The fund is an equity fund whose objective is to achieve the highest capital growth possible while adhering to the investment strategy. The fund is an actively managed equity fund that invests in small cap companies listed on Nasdaq OMX Stockholm. The fund invests in companies whose market capitalisation does not exceed 0.5% of the total market capitalisation on Nasdaq Stockholm and complies with our Responsible Investment Standard. The fund is permitted to invest up to 10 percent of its net asset value in other Nordic equity markets.

## Fund facts

Inception date	29 May 1997
Price quotation	Daily
Entry charge	None
Exit charge	None
Ongoing charge	1.50%
Manager	Stefan Kopperud
Deputy manager	Anders Avervik
Benchmark index	Carnegie Small Cap Total Return Net

Fund number with the Swedish Pensions Agency **416867**  
 Registration number 504400-5741

## Management report

The fund rose by 16.6 percent in 2017, while its benchmark index rose 8.8 percent.

Fund assets also grew during the period, from SEK 2,306 million to SEK 2,793 million. The fund had a net inflow of SEK 100 million during the year.

2017 was a good year for the stock market and the Stockholm Stock Exchange (OMX Stockholm Benchmark Cap) rose 10.0 percent including dividends. Financial stimulus and robust global growth contributed to corporate profit performance and the market upturn. Small cap stocks continued performing well, while the fund clearly outperformed its benchmark index. The main positive contributors to fund performance were Nolato, Kindred Group, MTG and Vitrolife. The lack of significant holdings with weak price development was another factor in the positive performance. Itab Shop Concept had the most negative impact on performance.

As of the reporting date, there are no other material risks in fund holdings beyond those outlined in the KIID and the prospectus.

In accordance with the fund rules, the Fund had the option to trade in derivatives, but did not utilise that option in 2017. The fund is also permitted to use the techniques and instruments referred to in chapter 25, section 21 FFFS 2013:9, but elected not to do so in 2017.

## Auditor's report

To the unitholders of SWEDEN MICRO CAP, a UCITS fund, corporate registration number 504400-5741

### Report on the annual accounts

#### Opinion

In our capacity as auditors of E. Öhman J:or Fonder AB (the management company), corporate registration number 556050-3020, we have audited the annual accounts of the SWEDEN MICRO CAP, a UCITS fund, for 2017.

In our opinion, the annual accounts have been prepared in accordance with the Investment Funds Act and Finansinspektionen's regulations regarding UCITS funds and present fairly, in all material respects, the financial position of SWEDEN MICRO CAP, a UCITS fund, as of 31 December 2017 and its financial performance for the year in accordance with the Investment Funds Act and Finansinspektionen's regulations regarding UCITS funds.

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. Our responsibilities under these standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the management company in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### The management company's responsibility

The management company is responsible for the preparation of the annual accounts and for that they provide a fair presentation in accordance with the Investment Funds Act and Finansinspektionen's regulations regarding UCITS funds. The management company is also responsible for such internal control they deem necessary to prepare annual accounts that are free from material misstatement, whether due to fraud or error.

#### Auditor's responsibilities

Our objectives are to obtain reasonable assurance as to whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could be reasonably expected to influence the financial decisions of users taken on the basis of the annual accounts. As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit.

#### We also:

- Identify and assess the risks of material misstatement in the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of the management company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of this internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management company.

- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts reflect the underlying transactions and events in a manner that achieves fair presentation.

We must inform the management company of matters including the planned scope, direction and timing of the audit. We must also inform the management company of significant audit findings during our audit, including any significant shortcomings in internal control that we identified.

Stockholm, 30 April 2018

Ernst & Young AB

Mona Alfredsson  
Authorised Public Accountant

**Tax liability of the fund:** As of 2012, fund income is not taxable. Funds do, however, pay withholding tax on dividends received on their foreign equity holdings. The withholding tax varies from country to country. For reasons including legal uncertainty about the application of double taxation treaties and developments within the EU in the tax area, the withholding tax may be either higher or lower than the preliminary withholding tax deducted when the dividend is received.

**Tax liability of investors:** Swedish unitholders pay income tax on an annual standardised income calculated on the value of fund units at the beginning of the year, as well as tax on profits and any dividends received on fund units. The annual standardised income corresponds to 0.4 percent of the value of the units at 1 January of the year. The standardised income is reported as capital income and taxed at 30 percent. Income statements for tax purposes are issued for natural persons and estates taxable in Sweden, while legal persons must independently calculate the standardised income and pay the tax. The tax may be affected by individual circumstances and investors who have questions about possible tax consequences should seek expert advice.
